

Culture, Gender, and Power in Conflict

Explore the myriad ways that culture, gender, and power differences create conflict and also complicate the understanding and management of conflict.

Particular attention will be given to:

- ✚ Culture/gender markers and value patterns,
- ✚ Culture/gender conflict norms,
- ✚ Conflict processing differences across culture/gender , and
- ✚ Ingroup/outgroup power dynamics and conflict.

Films and role-plays will be used extensively to allow students to observe and analyze course principles in “real-life” settings. Practical approaches for working with the dynamics of culture, gender, and power will be emphasized.
